PROFILE

I am an experienced focus puller with highly developed technical skills and enjoy being able to contribute to the creative process.

I enjoy new challenges and tasks that test my skills and I am constantly looking to develop.

As a focus puller the people I work along side are important to me, I endeavour to always make the department fun and run as smoothly as possible whilst looking out for the needs of the entire team.

I've worked with most current camera formats and regularly attend seminars and training days to ensure that I am completely up to speed with the latest developments, technology and techniques.
